About Us

AG Specialty Services Inc., with locations in New York and Florida, is a training center for continuing education and accreditation, teaching doctors and other types of medical professionals. Our company teaches industry workers, everyday people and babysitters how to save lives. As an Emergency Care & Safety Institute (ECSI) training center, composed of the American Orthopedic Association and the Emergency Physicians Association which created the first EMT and Paramedic associations in the nation, we teach all the medical courses needed.

We are a fully approved course provider for the United States Coast Guard National Maritime Center, are on their website as such, complying with the STCW (Standards of Training, Certification and Watchkeeping) regulations for the training of mariners. Courses include Basic Fire Fighting, Boating Safety, First Aid/CPR/AED, Hazardous Materials Regulations, Medical Care Person in Charge, Medical Care Provider, Personal Survival Techniques, Personal Safety and Social Responsibility, and Train the Trainer Courses (for Instructors).

The training for mariners allows them to handle any type situation in both domestic and international waters in accordance with the Standard for Training Certification, and Watchkeeping: This is implemented by the U.S. Coast Guard in order to ensure that US Merchant Mariners have the skills and abilities to serve aboard types of seagoing vessels.

Merchant mariners, rough necks on oil platforms, NOAA, US Sea Lift Command, cruise ship personnel, fishing vessels, and others must take and update the following STCW courses every five years: First Aid/CPR/AED, Basic Fire Fighting, Personal Survival Techniques, Personal Safety and Social Responsibility. Mariners are required to take our other courses for job requirements or advancement.

AG Specialty Services is (1) of three (3) companies approved by the USCGNMC to teach Hazardous Material Regulations and one (1) of two (2) companies approved to teach the Safe Boating course nationally. NASBLA approval is currently being applied for in each state for the safe boating course.

United States Coast Guard National Maritime Center Approved Courses

Additional Courses

39. Hydration, 40. Hazards Within Hotels Bloodborne and Airborne Pathogens, 41. ECG/EKG, 42. Phlebotomy

In the United States, someone has a heart attack every 34 seconds. Approximately 300,000 people in the United States experience an out-of-hospital cardiac arrest each year. Approximately 4 out of 5 sudden cardiac arrests happen at home. When the heart stops beating, a victim's chance of survival decreases by 7-10% for every minute that defibrillation is delayed.

About half of Americans (49%) have one of three key risk factors that increase their chances for heart disease or having a heart attack: high blood pressure, high LDL cholesterol, smoking. Other medical conditions and lifestyle choices that can put people at risk include diabetes, obesity, and excessive alcohol use. Few victims experiencing sudden cardiac arrest outside of a hospital survive unless a rapid sequence of events takes place in the first few minutes: Recognition and Action, CPR, Defibrillation, Advanced Care. Learn life-saving skills today. Be prepared to help others in need tomorrow." © ECSI)) <https://www.youtube.com/embed/0GUnXHw3D4>

We are cleared to teach the newly approved Boy Scout's Wilderness First Aid course. We provide training and skills for all civilians, medical professionals, and mariners as well as safety lectures. Our instructors are approved and certified by the following organizations: American Heart Association (AHA), Emergency Care and Safety Institute (ECSI), American Safety Health Institute (ASHI), OSHA and the United States Coast Guard at the National Maritime Center.

We have created a unique section designed strictly for the hotel and hospitality industry which is included when we teach the existing Bloodborne and Airborne Pathogen class. In hotels, motels, and restaurants all over the country, jobs are being done carelessly while workers contaminate themselves and the people they are attending.

has increased, thus lowering productivity and profit.

As you may be aware, many states and agencies, including OSHA are mandating that all organizations are required to have basically trained personnel to act as interim first responders until EMTs, Paramedics and other professionals can arrive on the scene.

Legislation in May 2001 mandated that all public schools in New York State be equipped with AEDs in their buildings; this includes all sport venues. The "Louis' Law." requires teachers and coaches to be certified in CPR/AED (automatic external defibrillators). In recent years, an increasing number of private companies have added AED's (automated external defibrillators) in office buildings, shopping malls, health clubs and even on commercial airliners. This use of equipment must be by certified people who must have other supportive training covering basic First Aid and CPR.

To assist you in meeting regulatory demands and for you to provide a safe environment for your associates, employees and customers, we at AG Specialty Services Inc. would like to help you formalize a training program. We would bring our instructors and equipment to you if needed and if you do have some current certifications, we can provide the renewal training.

Payments for courses are to be paid in advance. Upon receipt of payment, books will be provided for study in advance of class. Classes are held in Floral Park, New York and West Palm Beach, Florida. AG Specialty Services Inc. reserves the right to cancel classes if the minimum amount of students is not met. If AG Specialty Services Inc. cancels any courses, money deposits will be refunded in full. The following pages within this this Brochure contain our course offerings.

We look forward to meeting with you to discuss how we can be of assistance to you and your business. Ask about our corporate or group rates and our pricing on all Jones and Bartlett books <http://www.jbpub.com/> or Pearson Publishing Books <http://www.bradybooks.com> as pricing is considerably less than popular book stores.

Terms of Service

PART I – Personal Details—AG Specialty Services Inc. will use this information to register you for courses and to secure your lodging and accommodations if requested.

PART II – Registration and Payment Terms – Reservists should use AG Specialty Services Inc. reservist-specific registration form. Advance registration and tuition payment are required to enroll and reserve space in AG Specialty Services Inc. courses.

Due to limited class sizes, early registration is highly encouraged. Tuition payment must be paid no later than two (2) weeks prior to the course state date. Full payment by certified or bank check or money order (payable to: AG Specialty Services Inc.), credit card (VISA, MasterCard, American Express), must accompany registration unless alternative arrangements have been made in advance with the AG Specialty Services Inc. Registration will be acknowledged by phone, email or letter from AG Specialty Services Inc.

You may pay in advance and register with Credit Card VISA, MasterCard, American Express, American Express Travel, Certified Check, Certified Money Order (Note: No personal checks will be accepted.) Refunds, Cancellations, and Substitutions – Full refund requests (less a \$25.00 processing fee per course registrant) will be honored if received in writing at least fifteen (15) days prior to the scheduled course start date.

Cancellations received after the refund deadline and “no shows” are subject to the full registration fees. In this particular case, the full course fee may be applied as a credit toward another AG Specialty Services Inc. course scheduled within one (1) year.

Substitutions may be made by notifying AG Specialty Services Inc. in writing at least one (1) working day prior to the start of the course.

AG Specialty Services Inc. reserves the right to change or cancel courses as necessary. Please note that AG Specialty Services Inc. will cancel a course if the minimum number of students is not achieved. If AG Specialty Services Inc. cancels a course for any reason, all course fees will be refunded in full. AG Specialty Services Inc. liability is limited to refund of course fees. This should be considered when making transportation arrangements (i.e. purchase of non-refundable airline tickets).

Reservation Confirmation Number and Official Orders –AG Specialty Services Inc. will assign you a confirmation number upon receipt of your registration form. Please forward a copy of your official orders to AG Specialty Services Inc. at your earliest convenience.

Active Duty Personnel should notify AG Specialty Services Inc. if orders are cancelled for any reason.

PART III – Affirmation -By signing the affirmation, you verify that you have read and understand AG Specialty Services Inc. registration form and that you agree to the terms and conditions contained within.

Exam, Pass/Fail Re-test Policy

Examination Rules

If you sit formal exams with AG Specialty Services Inc. you must be aware of the following requirements.

Policies and rules ensure equity and efficiency in our processes. Merchant Mariners should familiarize themselves with their obligations in regard to exams.

Any breach of the requirements, whether committed intentionally or unintentionally may be regarded as ‘misconduct’, and dealt with under the AG Specialty Services Inc. AG Specialty Services Inc. Dishonesty Procedures contained within the AG Specialty Services Inc. Honesty Policy.

Merchant Mariners are responsible for reading their timetables carefully and checking them on a regular basis. Misreading the exam timetable and failing to attend will not constitute sufficient grounds to apply for a replacement exam.

As a general rule, AG Specialty Services Inc. does not consider minor ailments such as colds and respiratory infections as grounds for being certified unfit to sit an exam.

Examination Materials Permitted / Not Permitted.

You are strongly advised not to bring a bag and/or personal items to the exam venue. AG Specialty Services Inc. takes no responsibility for any loss or damage to those items.

Merchant Mariners bringing bags into the exam venue may be subject to inspection as you enter the venue. Place all the materials you will need on your desk and put any other materials eg. mobile phones and pencil cases in your closed bag under your seat.

Only bring to an exam those items which you need to undertake the exam.

You MUST BRING to Each Examination

Your current ID or other photo identification

Reasonable supplies of all required writing materials, erasers, etc.

Materials Permitted

A small purse or wallet, including keys, money, ID & credit cards, One clear bottle of clear water, up to 1 liter in size (water is available at the venue), A closed bag stored under your seat, Any materials specified by the examiner, as set out on the front page of the exam paper.

Materials Not Permitted

You must not bring into the exam venue any material which enables, or has the potential to enable, you or others to cheat or to gain an unfair AG Specialty Services Inc. advantage. Examples of materials which are not permitted include, but are not limited to: Writing or other paper dictionaries, textbooks, notes or other reference material not specified on the front page of the exam paper electronic devices including: diaries, dictionaries, organizers, laptop or palmtop computers unless specified by the examiner any drinks other than clear water in a clear container.

Where an examiner permits, or requires the use of materials that are not normally permitted, the examiner will advise you in advance and a statement approving their use will appear on the front page of the exam paper. If the front page does not specifically authorize the use of items not normally permitted in an exam, Merchant Mariners will not be allowed to use them.

- **Note: Certain courses have 2 retests; others have 1 retest.**

Telephone: 844-535-4448

Exam, Pass/Fail Re-test Policy (Continued)

Materials Not Permitted (Continued)

Where an examiner permits an individual Merchant Mariner (unique to the rest of the candidates) to use exam aides (such as a CFRs and charts), the examiner must provide written authorization to the Merchant Mariner and a copy must be sent to the Examinations Office. The Merchant Mariner must present this authorization to the exam supervisor at the venue at the commencement of the exam.

An exam supervisor will confiscate any unauthorized material brought into an exam venue. Being in possession of such material during an exam constitutes a breach of the AG Specialty Services Inc. Honesty Policy & Academic Dishonesty Procedures and will be dealt with according to the relevant principles.

Materials Not to be Removed

You must not remove any materials issued for use in the exam. All such materials remain the property of the AG Specialty Services Inc., whether they were used or not. These include completed scripts, ripped out pages, blank answer books, question papers, drawing paper and scribble paper.

Mobile Phones

You are not permitted to bring your mobile phone into the exam venue unless it is switched off and stored in your closed bag under your seat.

If a mobile phone is found switched on in your possession during the exam it will be deemed as a breach of the policy and will be held as unauthorized material and returned to you at the end of the exam. This may result in the matter being referred to the Head of School for further action in accordance with the AG Specialty Services Inc. Dishonesty Procedures.

You are not permitted to bring your mobile phone into the exam venue unless it is switched off and stored in your closed bag under your seat.

If a mobile phone is found switched on in your possession during the exam it will be deemed as a breach of the policy and will be held as unauthorized material and returned to you at the end of the exam. This may result in the matter being referred to the Head of School for further action in accordance with the AG Specialty Services Inc. Dishonesty Procedures.

Pass-Fail Policy

Will be based on a 50-question written exam, each question worth 4 points – passing grade = 80; failing grade = 79.

Retest Policy

a) Re-Test Policy Students are permitted to re-take a failed examination or an unsuccessful lab exercise or practical demonstrations no more than twice. For written examinations, a new test will be given that does not contain any questions that appeared on previous examinations, quizzes, or homework given to the student. A student that fails an examination or cannot successfully complete an exercise or demonstration after three attempts will be required to re-take the entire course.

b) If an applicant for an upper level officer endorsement as defined in NVIC 03-14 fails the exam, a complete re-examination must be administered. At least 2 hours must lapse for studying before another complete examination is attempted.

c) The applicant may be retested whenever the course and examination can be rescheduled with AG Specialty Services Inc. if the applicant does not successfully complete all parts of the examination which must take place within a 10-day period from the last test date.

d) If an applicant fails two tests, the applicant must pay to take the course and exams over.

e) Applicants failing several exams with an extremely low score should be encouraged to study before attempting another course and examination.

f) Re-test exams are required to be separate and different from the previous test taken.

Course Limitations (Student/Instructor Ratio)

The number of candidates per course shall not exceed 24. Lab exercises are conducted as a group for instruction and individually for participation and assessment. The student to instructor ratio will be 6/1 for labs / assessments and 6/1 for classroom instruction.

Course Completion Requirements In order to successfully complete this course, each candidate must obtain a grade percentage of not less than 80% on all examinations and successfully complete each lab exercises and practical demonstrations. All lab assignments, homework assignments, exercises, and tests must be completed and returned to the instructor for credit. A course completion certificate will not be issued if the course requirements are not completed in full.

Course Completion Certificate 1: Each student who successfully completes this course will be issued a course completion certificate. The certificate includes the candidate's name, and the date when the course was completed. It will also include the name of the course as approved by the Coast Guard, the approval granted to the course by the Coast Guard, and the Coast Guard course code. This certificate should be presented to the Coast Guard when applying for endorsements to a Merchant Mariner Credential (MMC).

Course Completion Certificate 2: Each student who successfully completes this course will be issued a course completion certificate. The certificate includes the candidate's name, and the date when the course was completed. It will also include the name of the course as approved by the Emergency Care and Safety Institute (ECSI) via AG Specialty Services Inc., the approval granted to the course by the Emergency Care and Safety Institute (ECSI) via AG Specialty Services Inc., and the Emergency Care and Safety Institute (ECSI) via AG Specialty Services Inc. course code.

- **Note: Certain courses have 2 retests; others have 1 retest.**

Rules of the Examination Room

1. The normal work hours for this AG Specialty Services Inc. are 0700 to 1800. The exam room will be opened from 0800 to 1600.
2. Handbags, briefcases, books, notes, cellular phones, pagers, smart watches, and/or other electronic devices are not allowed in the Exam Room. The applicant is to provide their own plotting equipment. Programmable calculators are not allowed in the exam room. During the examination, the applicant may not refer to any material other than that which is specifically authorized by the AG Specialty Services Inc.
3. Any applicant engaged in any form of cheating during the exam, such as, referring to concealed notes, communicating with or copying work from other applicants, removing written material from the exam room, or any other dishonest practice, will be dismissed from the exam room and will be considered to have failed the entire exam. A re-exam will not be permitted for six months.
4. Applicants are not permitted to leave the exam room before a module is completed. Head (restroom) calls are not normally permitted. However, if required, the applicant shall be escorted to ensure that no attempt is made to access additional information related to the exam. See Item#3. Upon completion of a module, all reference publications must be returned to their proper location in the exam room. The answer sheet and scratch paper is to be placed inside of the front cover of the booklet and given to the Examiner. Any charts, maneuvering boards, etc. must be given to the Examiner for shredding.
5. Eating and drinking are not permitted in the exam room.
6. Modules may be administered in any order agreed to between the applicant and AG Specialty Services Inc. Examiner provided that all modules are attempted before any retests. There will be a morning and an afternoon exam period daily, each consisting of 3.5 hrs. It is expected that applicants will only attempt one module per exam period. At the discretion of the AG Specialty Services Inc. examiner, an applicant may attempt additional modules during an exam period, however, no additional time will be provided to complete a module. Once testing has begun, applicants may not skip exam periods and all modules must be completed on consecutive days within the same week. The Chief of the AG Specialty Services Inc. may approve modifications based on exigent circumstances.
7. Once a module has been started, the applicant is obligated to complete it. If an answer sheet is submitted with unanswered questions, these questions will be considered to have been answered incorrectly, which may result in a failing score.
8. Do not write or mark in the test booklets or any reference material. If the applicant notices any marks in a test booklet or in any reference material, or if any illustrations/pages are missing, please notify the Examiner.
09. The Examiner is always available to assist the applicant. However, the Examiner cannot discuss question content with the applicant.

I have read and understand the rules as stated above. I also understand that I MUST complete the entire exam, including retests if required, WITHIN 90 DAYS of the beginning of the exam cycle and WITHIN THE ONE YEAR approval period of the Approved to Test (ATT) letter.

USCG NMC /AG Specialty Services Required Instructor Qualifications for STCW Approved Courses

We evaluate all instructors along with The United States Coast Guard National Maritime Center.

The Instructor Course is designed by the International Maritime Organization and overseen by The United States Coast Guard National Maritime Center and AG Specialty Services Quality Control.

USCG NMC/AG Specialty Services Inc. Instructor Qualifications STCW Approved Courses

Required for training as an Instructor

- 1 Read Instructor Course Book
- 2 5 day Instructor Training course after completion of the basic course(s) unless proof of previous teaching.
- 3 Teach a minimum of 4 classes with Training Center Administrator or Instructor Trainer.
- 4 Teach 2 classes a year, 4 classes in 2 years
- 5 Be evaluated and observed twice a Year by teaching 2 courses with AG Specialty Services Inc.

Recertify every 2 years

- 1 Take, recertify, and update course
- 2 Take Test of course teaching
- 3 Take Practical test
- 4 Take any other test for any other courses you are certified to teach by The United States Coast Guard National Maritime Center/AG Specialty Services Inc.

To Teach Courses Required Instructor Qualifications

Basic Training (STCW A-VI/1)

Instructors should meet the requirements below for each component of BT they will teach.

First Aid & CPR (STCW A-VI/1-3)

Hold a current certification as a First Aid and/or CPR instructor from nationally recognized medical training organization; or be an EMT, Nurse or Medical Doctor; or have experience as a military Hospital Corpsman.

Medical Care Person in Charge (STCW A-VI/4-2)

Experience as a Registered Nurse, Physician Assistant, Nurse Practitioner or Medical Doctor. EMTs may teach lessons within their training and experience.

Medical Care Provider (STCW A-VI/4-1)

Experience as a Hospital Corpsman, EMT, Registered Nurse, Physician Assistant, Nurse Practitioner or Medical Doctor.

Hazardous Material Regulations:

Relevant experience hazwoper procedures

Train the Trainer:

1 year teaching or developing courses

Safe Boating:

Relevant experience/US Coast Guard Auxiliary Instructor

Personal Safety & Social Responsibilities (STCW A-VI/1-4)

At least two years shipboard experience on vessels of at least 200 GRT / 500 GT.

Personal Survival Techniques (STCW A-VI/1-1)

At least one year of shipboard experience as a deck officer on vessels of at least 200 GRT / 500 GT or other shipboard experience in a capacity with responsibility for operation, testing, and maintenance of survival equipment, conducting of abandon ship drills; and the training of passengers and/or crew in lifesaving equipment and procedures. Equivalent military experience in a deck rating of Boatswain Mate or a Survival or Rescue Swimmer is also acceptable.

Basic Fire Fighting (STCW A-VI/1-2)

At least one-year experience as deck or engineering officer on vessels of at least 200 GRT/500 GT; or equivalent military damage control experience, or experience as a professional fire fighter.

Advanced Fire Fighting (STCW A-VI/3)

At least one-year experience as deck or engineering officer on vessels of at least 200 GRT/500 GT; or equivalent military damage control experience; or experience as a professional fire fighter.

Emergency Care and Safety Institute (ECSI) Instructor Course

If you have little teaching experience but would like to train others to perform life-saving skills like basic life support, automated external defibrillation (AED), or administering first aid, you can participate in an ECSI Instructor Development Course (IDEC). This course covers topics such as teaching methodologies, complying with ECSI Policies and procedures, following course objectives, and conducting skills practice sessions.

The purpose of this course is to assist training providers and their teaching staff in organizing and introducing new training courses, or in enhancing, updating, or supplementing existing training material, so that the quality and effectiveness of the training courses may thereby be improved.

It is not the intention of this course program to present instructors with a rigid “teaching package, which they are expected to “follow blindly”. Nor is it the intention to substitute the instructor’s presence with audio-visual or programmed material. As in all training endeavors, the knowledge, skills and dedication of the instructors are the key components in the transfer of knowledge and skills to those being trained through the courses.

We evaluate all instructors.

The Instructor Course is designed by Emergency Care and Safety Institute (ECSI) and AG Specialty Services is responsible for Quality Control of their training center.

Required for training as an Instructor

1. Read Instructor Course Book
2. Instructor Training course after completion of the basic course (s). unless proof of previous teaching.
3. Teach a minimum of 4 classes with Training Center Administrator or their

Instructor Trainer.

4. Teach 2 classes a year. 4 classes in 2 years.
5. Be evaluated and observed twice a Year by teaching 2 courses with AG Specialty Services Inc.

Recertify every 2 years

1. Take, recertify, and update course
2. Take Test of course teaching
3. Take Practical test
4. Take any other test for any other courses you are certified to teach by AG Specialty Services Inc.

Heroes Aren't Born—They're Trained Become a Hero™ Let us train you! Learning is Fun!™

AG Specialty Services Inc. is a specialty type medical and mariner training center with locations in New York and Florida with a planned expansion into other states. We train doctors and all types of medical professionals as well as industry workers in situations where it is important to save lives. We teach the gamut of everyday people to babysitters. The company is on the United States Coast Guard National Maritime Center and the United States Navy's Military Sealift Command websites as an approved course provider. We comply with the STCW for the training of mariners and teach merchant mariners, rough necks on oil platforms, NOAA, US Sea Lift Command, cruise ship personnel, fishing vessels, recreational boaters, and others how to save lives and do their jobs safely.

Core Competencies

Our Medical and Mariner Training is a competency-based training that Mariners, Health Professionals and everyday people use in building the knowledge and skills needed for their jobs. The Core Competencies have been incorporated into the teaching management systems, educational programs, and other training initiatives.

A Letter of Accreditation Regarding the Emergency Care and Safety Institute (ECSI)

Dear Sir or Madam:

The American Academy of Orthopaedic Surgeons (AAOS) is the authoring medical agency behind the Emergency Care and Safety Institute (ECSI), a national provider of First Aid, CPR, AED, Bloodborne Pathogens, First Responder, Wilderness Care, and numerous other course materials for the training of laypersons and professionals.

The AAOS has a long history of providing training materials to emergency medical responders, which began in 1971 with the publication of *Emergency Care and Transportation of the Sick and Injured*, the nation's first textbook for EMT-Basics. Today this book is in its Ninth Edition and continues to prepare EMTs for their vital job. The AAOS is pleased to continue this tradition of emergency care education with our involvement in the ECSI.

The medical content in our CPR and first aid courses is consistent with the latest *Consensus Guidelines for CPR and ECC*, and includes the most recent white paper research updates from the American Heart Association (AHA). Additionally, all of our courses have been updated to reflect the *2010 Consensus Guidelines for CPR and ECC*. All ECSI courses meet or exceed the medical objectives of similar programs, such as those released by the AHA and the American Red Cross.

In addition to medical oversight of these programs from the AAOS, the American College of Emergency Physicians (ACEP) endorses all ECSI courses.

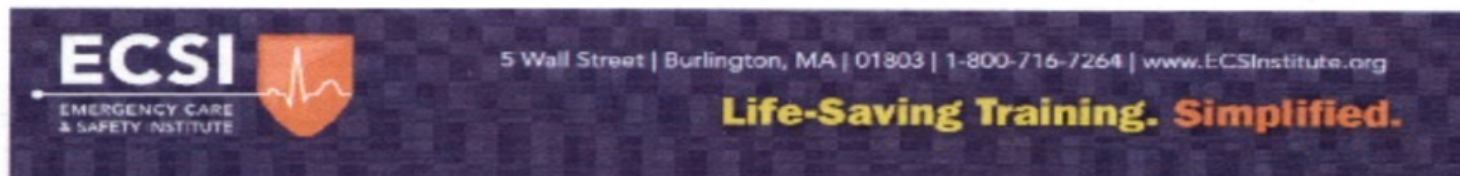

Both the AAOS and ACEP believe the quality and usability of ECSI course materials are unrivaled, and we are proud to stand behind the organization and its important mission of make lifesaving skills training accessible and affordable to as wide a population as possible.

Thank you for your involvement in ECSI, and best of luck with your endeavors.

Sincerely,

Mark W. Wieting
Chief Education Officer
American Academy of Orthopaedic Surgeons

**Letter of Accreditation Regarding
the
Emergency Care and Safety Institute (ECSI)**

January 03, 2014

RE: A Letter of Accreditation Regarding the Emergency Care & Safety Institute (ECSI)

Dear Sir or Madam:

The Emergency Care & Safety Institute (ECSI) is a recognized international provider of emergency care and safety training, with thousands of Education Centers and instructors worldwide. ECSI is the only training organization with an exclusive relationship with both the American Academy of Orthopaedic Surgeons (AAOS) and the American College of Emergency Physicians (ACEP), both of whom serve as the authoring medical bodies and endorsement for ECSI.

The AAOS has a long history of providing training programs and materials to emergency medical responders, which began in 1971 with the publication of *Emergency Care and Transportation of the Sick and Injured*, the nation's first textbook for emergency medical technicians (EMTs). Today, this book is in its Tenth Edition and continues to prepare EMTs for their vital job.

ACEP, founded in 1968, is the world's oldest and largest emergency medicine specialty organization, recognized as the leader in emergency medicine. ACEP provides medical review and direction for all levels of ECSI programs, from lay person to health care professionals.

Both AAOS and ACEP provide input into the process of setting national guidelines, such as those published by the American Heart Association.

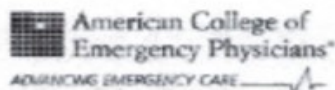

The medical content in all ECSI courses is consistent with the latest CPR, AED and first aid guidelines. All ECSI courses are updated to reflect the **2010 ILCOR Consensus Guidelines for CPR and ECC**. All ECSI courses meet or exceed the medical objectives of similar training programs, such as those released by the American Heart Association.

AAOS and ACEP believe the quality of ECSI training programs and materials is unrivaled, and stand behind ECSI as an organization and its important mission of make lifesaving skills training accessible and affordable to as wide a population as possible.

Respectfully,

A handwritten signature in black ink that reads 'Denise Howard'.

The training for mariners allows them to handle any type situation in both domestic and in international waters in accordance with the Standard for Training Certification, and Watchkeeping. This is implemented by the U.S. Coast Guard in order to ensure that U.S. Merchant Mariners have the skills & abilities to serve aboard seagoing vessels. This is in compliance with STCW (International Conventions on Standards of Training Certification and Watchkeeping for Seafarers).

Course Code New York: USCGNYBS

Course Name: Boating Safety

The Boating Safety Course is an introductory course to meet the boating education needs of recreational boaters. General information concerning boats and maintenance, information to make your boating experience safer and more comfortable, tips on how to be a more courteous boat operator, laws and regulations to which you must adhere are included. The following information applies to all recreational vessels (powerboats, personal watercraft, sailboats, and boats under oars when underway). However, in some places information may apply specifically to one type of boat, equipment, or activity.

We encourage you to continue to learn more about boating safety on your. *Anyone successfully completing your Boating Safety (AGMEDI-74) course with a final score of 80% or higher and presenting your Certificate of Training will: Satisfy the Safe Boating Course requirements of 46 CFR 11.429(a)(2), 11.456(b), and 11.467(g)(2); OR • Receive 2 days sea service credit towards any deck credential restricted to service upon vessels of not more than 100 gross tons. This sea service credit may not be used to satisfy any recency requirements.*

Course Code New York: USCGNYMCPI

Course Name: Medical Care Person in Charge

This 5 day course is designed to provide Emergency Medical Technician type training to the marine officer so that she/he may properly respond to medical emergencies occurring on board ship. Training as a Person in Charge of Medical Care (PIC Medical Care) is the third level of medical training provided under the STCW. This competency provides for a specified crew member or crew members to effectively participate in coordinated schemes for medical assistance on seagoing ships and to provide the sick or injured with a satisfactory standard of medical care while they remain onboard. The course consists of modules of instruction in anatomy and physiology, patient assessment, soft tissue injuries, fracture management, emergency dentistry, medical and environmental emergencies, urinary catheterization, CPR, automated external defibrillation, oxygen administration and airway maintenance, intravenous therapy, wound care and suturing, and alcohol and drug abuse. The average ship's crew member, including senior officers, is typically unfamiliar with such skills. *Any applicant who has successfully completed your Medical Care Person In Charge (AGMEDI-307) course will satisfy the Medical Care Person In Charge training requirements of Section A-VI/4 and Table A-VI/4-2 of the STCW Code.*

Course Code New York: ACLSECSINY14

Course Code Florida: ACLSECSIFL14

Course Name: Advance Cardio Life Support (ACLS) (ECSI)

Advanced Cardiovascular Life Support (ACLS) is an advanced, instructor-led classroom course that highlights the importance of team management of a cardiac arrest, team dynamics and communication, systems of care and immediate post-cardiac-arrest care. Specific skills in airway management and related pharmacology are also featured. Skills are taught through discussion and group learning, while testing stations offer case-based scenarios using simulators. ACLS is designed for health-care professionals who either direct or participate in the management of cardiopulmonary arrest and other cardiovascular emergencies. This includes personnel in emergency response, emergency medicine, intensive-care and critical-care units. The prerequisite for ACLS is a current HSF BLS for Healthcare Provider (C) card.

Key changes in advanced cardiovascular life support, reflecting the 2017 Guidelines for Cardiopulmonary Resuscitation (CPR) and Emergency Cardiovascular Care (ECC). Basic life-support skills, including effective chest compressions, use of a bag-mask device and an automated external defibrillator (AED). Recognition and early management of respiratory and cardiac arrest using a manual defibrillator and equipment commonly found on a crash cart. Recognition and early management of peri-arrest conditions such as symptomatic bradycardia, Airway management, Related pharmacology, Management of acute coronary syndromes (ACS) and stroke, Effective communication as a member and leader of a resuscitation team, Effective resuscitation team dynamics, Skills are taught in large group sessions, as well as in small-group learning-and-testing stations, where case-based scenarios are presented.

Course Code Florida: PALSECSIFL14

Course Name: Pediatric Advanced Life Support (PALS) (ECSI)

The Pediatric Advanced Life Support (PALS) Provider course enables healthcare professionals to develop the knowledge and skills necessary to better recognize and treat critically ill infants and children. The course materials are scenario-based, and a team approach is used to teach emergency management of pediatric patients approaching or already in respiratory or cardiac arrest, from the early minutes through patient stabilization and/or the transport phases of a pediatric emergency, in or out of the hospital. The PALS course is designed for healthcare professionals who initiate and direct advanced life support in pediatric emergencies and for healthcare students seeking first-time or renewed PALS-training credentials. The prerequisite for PALS is a current HSF BLS for Healthcare Provider (C) card. Recognition and treatment of infants and children at risk for cardiopulmonary arrest, Systematic approach to pediatric assessment, Effective respiratory management, Validation of skills for one-person and two person CPR and AED skills for infants and children, Defibrillation and synchronized cardioversion, Intraosseous access and fluid bolus administration, Effective resuscitation team dynamics.

Course Name: Bloodborne and Airborne Pathogens (ECSI)

Bloodborne and Airborne Pathogens includes supplemental information on airborne pathogens such as tuberculosis. This manual is developed for use within infection control courses offered through the Emergency Care & Safety Institute. Over five million workers in health care related fields are at risk to exposure to bloodborne pathogens, such as the HIV virus and hepatitis B virus. Designed to meet the current Occupational Safety and Health Administration (OSHA) training requirements, Bloodborne and Airborne Pathogens, Sixth Edition is designed to teach students and employees how to prepare for potential occupational exposure to blood or other potentially infectious materials. Bloodborne and Airborne Pathogens, Sixth Edition also includes supplemental information on airborne pathogens, such as tuberculosis, and other unusual infectious diseases. Exam: An exam is composed of multiple choice and true/false questions. Everyone must also demonstrate simulated practical skills to show competency.

Course Name: Wilderness First Aid (Boy Scout/Civil Air Patrol Approved) (ECSI)

The second edition of the Wilderness First Aid Field Guide meets the Wilderness First Aid Curriculum of the Boy Scouts of America.

Wilderness First Aid Field Guide, Second Edition is a user-friendly, pocket-sized guide based on the latest first aid and CPR guidelines. This durable and water-resistant resource features:

- Essential information for when medical help is more than one hour away
- How to signal for help, when to evacuate, and recommended first aid supplies
- “What to look for” and “What to do” tables for injuries and illnesses
- Prevention advice ranging from altitude illness and bear attacks to lightning strikes and tick bites
- Heat index and wind chill charts
- Quick access to contents using an A-Z format

The second edition features:

- Updated CPR and AED content
- Updated asthma and diabetic emergencies sections
- New sections on ear and chest injuries, including new information on chest pain
- Expanded content on bleeding and wound care, including new information on tourniquet use
- New information on scalp wounds and brain injuries in the head injury section

Medical Courses

Course Code New York: ITECSINY01
Course Name: Instructor Training (ECSI)

Course Code Florida: ITECSIFL01

If you have little teaching experience but would like to train others to perform life-saving skills like basic life support, automated external defibrillation (AED), or administering first aid, you can participate in an ECSI Instructor Development Course (IDEC). This course covers topics such as teaching methodologies, complying with ECSI Policies and procedures, following course objectives, and conducting skills practice sessions.

The purpose of this course is to assist training providers and their teaching staff in organizing and introducing new training courses, or in enhancing, updating or supplementing existing training material, so that the quality and effectiveness of the training courses may thereby be improved.

It is not the intention of this course program to present instructors with a rigid "teaching package, which they are expected to "follow blindly". Nor is it the intention to substitute the instructor's presence with audio-visual or programmed material. As in all training endeavors, the knowledge, skills and dedication of the instructors are the key components in the transfer of knowledge and skills to those being trained through the courses.

We evaluate all instructors.

The Instructor Course is designed by Emergency Care and Safety Institute (ECSI) and AG Specialty Services is responsible for Quality Control of their training center.

Required for training as an Instructor

1.Read Instructor Course Book

2.Instructor Training course after completion of the basic course

(s). unless proof of previous teaching.

3.Teach a minimum of 4 classes with Training Center Administrator or their

Instructor Trainer.

4.Teach 2 classes a year. 4 classes in 2 years.

5.Be evaluated and observed twice a Year by teaching 2 courses with AG Specialty Services Inc.

Recertify every 2 years

1.Take, recertify, and update course

2.Take Test of course teaching

3.Take Practical test

4. Take any other test for any other courses you are certified to teach by AG Specialty Services Inc

Medical Courses

Military Medicine

New York Course Code: TCCCNY07

Florida Course Code: TCCCFL07

Course Name: Tactical Combat Casualty Care (TCCC)

The U.S. Department of Defense's Tactical Combat Casualty Care course, conducted by NAEMT, introduces evidence-based, life-saving techniques and strategies for providing the best trauma care on the battlefield.

NAEMT's TCCC course is the only TCCC course endorsed by the American College of Surgeons.

The Tactical Combat Casualty Care (TCCC) course introduces evidence-based, life-saving techniques and strategies for providing the best trauma care on the battlefield.

NAEMT conducts TCCC courses under the auspices of its PHTLS program, the recognized world leader in prehospital trauma education.

NAEMT's TCCC courses use the PHTLS Military textbook and are fully compliant with the Department of Defense's Committee on Tactical Combat Casualty Care (CoTCCC) guidelines.

It is the only TCCC course endorsed by the American College of Surgeons. The TCCC-MP (TCCC for Medical Personnel) course is designed for combat EMS/military personnel, including medics, corpsmen, and pararescue personnel deploying in support of combat operations.

NAEMT also offers Tactical Emergency Casualty Care (TECC) for civilian tactical EMS.

The TCCC-AC (TCCC for All Combatants) course is designed for non-medical military personnel and includes first responder skills appropriate for soldiers, sailors, airmen and marines.

TCCC Tourniquets-and-Hemostatic Dressings. The Number One Medical Priority for Initial Management of Trauma Victims Early control of severe hemorrhage is critical.

Prior to TCCC and effective battlefield tourniquets, extremity hemorrhage was the most frequent cause of preventable battlefield deaths. Injury to a major vessel can quickly lead to shock and death.

Only life-threatening bleeding warrants intervention during Care Under Fire.

NY Course Code: TCCCNY01

Florida Course Code: TCCCFL01

Tourniquets-and-Hemostatic Dressings The Number One Medical Priority for Initial Management of Trauma Victims. Early control of severe hemorrhage is critical.

Prior to TCCC and effective battlefield tourniquets, extremity hemorrhage was the most frequent cause of *preventable* battlefield deaths.

Over 2500 deaths occurred in Vietnam secondary to hemorrhage from extremity wounds.

Injury to a major vessel can quickly lead to shock and death.

Only life-threatening bleeding warrants intervention during Care Under Fire.

New York Course Code: ASSETNY04

Florida Course Code: ASSETFL04

Course Name: Advanced Surgical Skills for Exposure in Trauma (ASSET)

The Advanced Surgical Skills for Exposure in Trauma (ASSET) course uses human cadavers to teach surgical exposure of anatomic structures that, when injured, may pose a threat to life or limb. Students use a course manual that provides an overview of surgical exposures in key areas: neck, chest, abdomen and pelvis, and upper and lower extremities. The one-day course covers each section, beginning with a case-based overview that is followed by a hands-on exposure guided by the faculty.

Military Medicine

New York Course Code: TMENY05

Florida Course Code: TMEFL05

Course Name: Tactical Medicine Essentials

All aspects of tactical medicine are explained in detail. The book has information on how to handle everything from routine medical problems to more complex and serious injuries and illnesses that can occur in the tactical environment.

Saving lives and reducing liability are goals of every law enforcement agency.

This course teaches and shows you how to accomplish this. It will be a valuable tool for any tactical medicine provider who works with law enforcement agencies, their special operations teams/SWAT, mobile field teams, bomb squads, K-9 units, and other elements with unique deployment circumstances that can benefit from close-up medical support.

The combat medic of today is the most technically advanced course ever produced. Such an advanced technician requires an advanced teaching and learning system.

The course was created to serve as a repository of the skills that the combat medics must learn to achieve entry level competence.

Today's combat medics must be an expert in emergency medical care, force health protection, limited primary care, evacuation and warrior skills. Similar to Combat Medic Field Manual, this course recognizes the special needs of the combat medic.

However, this course will and must change over time, as we acquire new lessons and learn better ways of saving lives.

American Academy of Pediatrics

Course Code New York: AAPBLSTBLASTNY16

Course Code Florida: AAPBLSTBLASTFL16

Course Name: American Academy of Pediatrics Babysitter Lessons and Safety Training (BLAST!)

BLAST! (Babysitter Lessons and Safety Training), Third Edition is an important training program for potential babysitters and parents considering hiring a babysitter. The BLAST! program is exciting and interactive, providing extensive training in pediatric first aid, household safety, and the fundamentals of childcare. Features of the Third Edition include:

Most current practices for safety and injury prevention while babysitting

First Aid basics for emergency response

Quick references tools for babysitters

Fun, easy to follow booklet

Designed for people ages 13 and older, their parents, and parents looking to hire a babysitter, the BLAST! program can prepare children to interview for a babysitting job, select safe and suitable games and activities, prevent accidents, perform first aid, and begin babysitting safely and competently.

Course Name: American Academy of Pediatrics Pediatric First Aid for Caregivers and Teachers

The American Academy of Pediatrics (AAP) is an organization dedicated to the health, safety, and wellbeing of infants, children, adolescent, and young adults. The AAP produces several pediatric first aid courses. One of these courses is Pediatric First Aid for Caregivers and Teachers (PedFACTs). This course is designed for caregivers, teachers, and others who care for children.

The PedFACTs course focuses on what to do if a child in your care suddenly becomes ill or gets injured. After completing the course caregivers, teachers, and others will be better able to:

- Apply the 4Cs of Pediatric First Aid to medical situations
- Recognize an ill or injured child

- Identify specific types of medical problems and give appropriate first aid care
- Know when to call emergency medical services (EMS)
- Know how to perform cardiopulmonary resuscitation (CPR)
- Understand what an automated external defibrillator (AED) does and how to use one

- Know what to do when a child is choking
- Give rescue medication for a breathing problem
- Use an epinephrine auto-injector for a severe allergic reaction

Additional Courses

New York Course Code: HWHBAPNY08

Florida Course Code: HWHBAPFL08

Course Name: Hazards Within Hotels Bloodborne and Airborne Pathogens

This course is strictly for the hotel and hospitality industry which is included when we teach the existing Bloodborne and Airborne Pathogen class to your personnel.

All staff will learn the most common day to day health problems employees' face and they will be taught what to do under all possible circumstances including the best ways to prevent damage, injury, and contamination.

The course is eight (8) hours long and is for all employees of the hotel and others in the hospitality industry to prevent potential occupational exposure to blood or other potentially infectious materials and gases.

We will certify your employees for a 2 year period with monthly safety briefs at your staff meetings. This will keep everyone thinking safe, how to limit illness and keep down absenteeism.

Procedures based on OSHA "Universal Precautions of PPE/barriers, Engineering Controls, and Work Practices: The OSHA standard—OSHA 1910.1030. Requires specific precautions for employees within health care related fields, Designated First Aiders, and others whose jobs will likely expose them to Blood borne pathogens.

Although hotels are not specifically covered by the standard, a reasonable, minimal approach is recommended to ensure employees: (1) Are aware of the hazards (2) Learn the most common day to day injury methods employees' face. (3) Know what to do under all possible circumstances. (4) Know what to do to prevent injury?

Bloodborne and Airborne Pathogens includes supplemental information on airborne pathogens such as tuberculosis and others. The included manual and supplemental information is developed for use within infection control courses offered through the Emergency Care & Safety Institute.

Over five million workers in health care related fields are at risk to exposure to bloodborne pathogens, such as the HIV virus and hepatitis B virus.

Designed to meet the current Occupational Safety and Health Administration (OSHA) training requirements, Bloodborne and Airborne Pathogens, Sixth Edition is designed to teach students and employees how to prepare for potential occupational exposure to blood or other potentially infectious materials.

Bloodborne and Airborne Pathogens, Sixth Edition also includes supplemental information on airborne pathogens, such as tuberculosis, and other unusual infectious diseases.

New York Course Code: HCMSNY21 **Florida Course Code:** HCMSNY21

Course Name: OSHA: Hazard Communication for Managers and Supervisors (HazCom/GHS)

This advanced OSHA HazCom for Supervisors & Managers online training course includes introductory and specialized materials which will enable supervisors to better recognize and eliminate, or reduce, Occupational Safety and Health Hazards in their work environments where there are hazardous chemicals. This course also reviews, in relative detail, OSHA's revised Globally Harmonized System (GHS) requirements for hazard classification, safety data sheets and product labels.

By taking this course and completing it successfully, you will be able to:

Describe the supervisory responsibilities for providing and maintaining safe and healthful working conditions for employees with respect to hazardous chemicals;

List the fundamental elements of OSHA's Hazard Communication Standard as it applies to employers;

Identify and locate other OSHA standards that align closely with OSHA's HCS (i.e., OSHA's Subpart Z);

Develop and/or implement an employer's written Hazard Communication Program meeting OSHA's expectations to include the hazardous chemical inventory, recording, reporting and availability of hazard communication information;

Select and utilize supervisor/managerial tips and tools for worker training and information surrounding hazardous chemicals, dealing with spills, detection and abatement of hazardous chemical hazards, and motivation of subordinates toward promoting safe, healthful and compliant work practices;

Recognize when additional HAZCOM training or retraining for employees is needed;

Identify two sources of additional information on HAZCOM.

Employees who successfully complete Hazard Communication for Managers and Supervisors (HazCom/GHS) will receive a completion card for 1.0 hours of continuing education.

Note: If your organization doesn't offer prehospital providers subscriptions to Recert yet, consider adding them to this package. Discover all that Recert has offer here.

Emergency Care & Safety Institute, ECSI, is the recognized international provider of emergency care and safety training with thousands of education centers and instructors worldwide. ECSI is the only training organization with an exclusive relationship with both the American Academy of Orthopedic Surgeons (AAOS) and the American College of Emergency Physicians (ACEP), both of which serve as the authorizing medical bodies and endorsement for ECSI.

The AAOS has a long history of providing training programs and materials to emergency responders. This began in 1971 with the publication of Emergency Care and Transportation of the Sick and Injured, the nations first textbook for emergency medical technicians (EMTs). Today this book is in its tenth edition and continues to prepare EMT's for their vital jobs.

ACEP, founded in 1968, is the world's oldest and largest emergency medicine specialty organization, recognized as the leader in emergency medicine. ACEP provides medical review and direction for all levels of ECSI programs from lay person to health care professionals.

Both AAOS and ACEP provide input into the process of setting national guidelines such as those published by the American Heart Association.

The medical content in all ECSI Courses is consistent with the latest CPR, AED and first aid guidelines. All ECSI courses are updated to reflect the 2010 ILCOR Consensus Guidelines for CPR and ECC. All ECSI courses meet or exceed the medical objectives of similar training programs, such as those released by the American Heart Association.

AAOS and ACEP believe the quality of ECSI training programs and materials is unrivaled and stand behind ECSI as an organization and its important mission of making lifesaving skills training accessible and affordable to as wide a population as possible.

The training for mariners allows them to handle any type situation in both domestic and international waters in accordance with the Standard for Training Certification, and Watchkeeping. This is implemented by the U.S. Coast Guard in order to ensure that US Merchant Mariners have the skills & abilities to serve aboard seagoing vessels. This is in compliance with STCW. Our instructors are approved and certified by the following organizations: American Heart Association (AHA), Emergency Care and Safety Institute (ECSI), American Safety Health Institute (ASHI), OSHA and the United States Coast Guard at the National Maritime Center. We have a doctor and nurse as Medical Directors and as we expand into the new areas, we will be directed by additional experts. As you may be aware, many states and agencies, including OSHA, are mandating that all organizations are required to have basically trained personnel to act as interim first responders until EMTs, Paramedics and other professionals can arrive on the scene.
